Usage and Storage

Lyophilized from sterile PBS, 50 % Glycerol, pH 6.6.

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.

Specific concentrations are included in the hardcopy of COA. Please contact us for any concerns or special requirements.

Note: When reconstituting, gently pipet and wash down the sides of the vial. Do not vortex.

Store for up to one year at -20°C to -80°C as lyophilized powder.

Please avoid repeated freeze-thaw cycles.

No activity loss was observed after storage at: -20°C to -80°C for 12 months in lyophilized state; -80°C for 3 months under sterile conditions after reconstitution.
